

2016-2017 Columbus & Franklin County Seasonal Influenza Activity Weekly Summary (Week 19, May. 7th, 2017– May 13th, 2017)

Highlights

- In week 19 of 2017, the majority of individual flu activity indicator trends decreased compared to last week and some have fallen below their baseline averages. As a whole, flu intensity (composite indicator) continues to be low.
- Geographic spread and local intensity designation (Click [here](#) for definitions) = SPORADIC, LOW
- Local medical facility labs reported 613 tests run with 8 (1.3%) positive results for week 19 of 2017. This is lower than last week's 3.2% and is below the weekly baseline.
- The percentage of ED visits for influenza-like-illness (ILI) and respiratory symptoms both increased compared to last week. The percentage of ED visits for both ILI and respiratory symptoms is above their respective baseline averages for the week.
- In week 19 of 2017, the majority of trends for categories of local over-the-counter medication sales tracked decreased (decrease in cough and cold, electrolyte, thermometer, chest rub, pediatric anti-fever, and adult anti-fever sales; stable throat lozenge sales) compared to last week.
- In week 19, influenza activity decreased in the United States. Please [visit the CDC website for specific information](#) (National data is usually updated on Friday of each week).

Local Flu Activity Dashboard *(All data are preliminary and may change as updated reports are received.)*

¹Interpret with caution. Indicators with small numbers subject to large weekly percentage fluctuations.

²Number of weeks "▲" = Increase (>2%), "▼" = Decrease (>2%), "●" = Stable (-2% to +2%).

³Black line is current years data. Based on data availability, red line is historical average (excluding pandemic year).

⁴Data Source: Medical claims data from athenaHealth® (www.athenahealth.com). Rate of Flu or ILI visits to Franklin County, OH athenaHealth® network primary care practices/physicians. Claims data are subject to filing and processing time lags. Historical data are updated when they are received.

⁵Franklin County, OH residents only (based on zipcode). NOTE: Excludes one hospital system included in the past due to technical changes affecting visit classification assignment and numbers.

⁶Confirmed cases only. Based on jurisdiction equal to Franklin County or City of Columbus and admission date available in ODRS.

Influenza Morbidity and Influenza-Like Illness (ILI) Reports

In week 19, the preliminary local influenza and influenza-like-illness (ILI) visit rate to athenaHealth® providers (0.9 per 1,000 visits) decreased compared to the previous week and is slightly below its baseline average for the week (Figure 1). The week 19 percentage of all Emergency Department (ED) visits categorized as ILI increased compared to the previous week (Figure 3) and is above its historic baseline for the week.

Nationally, during week 19 of 2017, 1.3% of patient visits reported through ILINet were due to influenza-like illness (ILI). The percentage is below the national baseline of 2.2% for week 19.

Laboratory Surveillance

During week 19 of 2017, reporting Franklin County sentinel medical facility laboratories tested 613 specimens, with 8 (1.3%) positive (Figure 4). The total number of tests done by local reporting labs from week 35 of 2016 through week 19 of 2017 is 51,667 with 8,342 (16.1%) positives (5,496 type A, 2,836 type B, 8 type A and B, 2 type unknown).

Nationally in week 19 of 2017, clinical laboratories reported 9,528 specimens tested for influenza viruses, 415 (4.4%) of which were positive (103 type A, 312 type B). Public health laboratories reported testing 292 specimens, 81 of which were positive (40 type A – of which 1 were A(H1N1)pdm09, 35 were A/H3, and 4 were not subtyped; 41 type B – of which 23 were Yamagata lineage, 5 were Victoria lineage, and 13 where lineage was not performed). Please visit the CDC website for more information, including cumulative data since week 40.

In week 19 of 2017, participating Ohio clinical labs reported 58,865 specimens tested for influenza this season thus far. Positive results include: (5) A(H1N1)pdm09; (653) A/H3N2; (4,199) Flu A Not Subtyped, and (3,724) Flu B (through 5/13/17). ODH Public Health Lab reported 1,264 specimens tested for influenza from various submitters this season thus far. Positive results include: (6) A(H1N1)pdm09; (760) A/H3N2; (260) Influenza B (through 5/13/17). Please visit the ODH website for more information.

ED Respiratory Visits

In the 19th week of 2017, the percentage of all ED visits categorized as respiratory increased compared to the percentage seen the previous week and is above its historic baseline for the week (Figure 5).

Over-the-Counter (OTC) Medication Sales

In week 19 of 2017, the majority of trends for categories of local over-the-counter medication sales tracked decreased (decrease in cough and cold, electrolyte, thermometer, chest rub, pediatric anti-fever, and adult anti-fever sales; stable throat lozenge sales) compared to last week.
