

2016-2017 Columbus & Franklin County Seasonal Influenza Activity Weekly Summary (Week 6, Feb. 5th, 2017– Feb. 11th, 2017)

Highlights

- In week 6 of 2017, the majority of individual local flu activity indicator trends increased and are above their baseline averages. As a whole, flu intensity (composite indicator) continued to increase and is categorized as high for week 6.
- Geographic spread and local intensity designation (Click [here](#) for definitions) = WIDESPREAD, HIGH
- Local medical facility labs reported 2,813 tests run with 835 (29.7%) positive results for week 6 of 2017. This is higher than last week's 23.2% and is higher than the weekly baseline.
- The percentage of ED visits for both influenza-like-illness (ILI) and respiratory symptoms increased compared to last week. The percentage of ED visits for both ILI and respiratory symptoms are above their respective baseline averages for the week.
- In week 6 of 2017, the majority of trends for categories of local over-the-counter medication sales tracked increased (increase in cough and cold, electrolyte, thermometer, pediatric anti-fever, adult anti-fever, and throat lozenge sales; decrease in chest-rub sales) compared to last week.
- Nationally, influenza activity increased in week 6. Please [visit the CDC website for specific information](#) (National data is usually updated on Friday of each week).

Local Flu Activity Dashboard *(All data are preliminary and may change as updated reports are received.)*

¹Interpret with caution. Indicators with small numbers subject to large weekly percentage fluctuations.

²Number of weeks "▲" = Increase (>2%), "▼" = Decrease (>2%), "●" = Stable (-2% to +2%).

³Black line is current years data. Based on data availability, red line is historical average (excluding pandemic year).

⁴Data Source: Medical claims data from athenaHealth® (www.athenahealth.com). Rate of Flu or ILI visits to Franklin County, OH athenaHealth® network primary care practices/physicians. Claims data are subject to filing and processing time lags. Historical data are updated when they are received.

⁵Franklin County, OH residents only (based on zipcode). NOTE: Excludes one hospital system included in the past due to technical changes affecting visit classification assignment and numbers.

⁶Confirmed cases only. Based on jurisdiction equal to Franklin County or City of Columbus and admission date available in ODRS.

Influenza Morbidity and Influenza-Like Illness (ILI) Reports

In week 6, the preliminary local influenza and influenza-like-illness (ILI) visit rate to athenaHealth® providers (8.1 per 1,000 visits) increased compared to the previous week and is above its baseline average for the week (Figure 1). The week 6 percentage of all Emergency Department (ED) visits categorized as ILI increased compared to the previous week (Figure 3) and is above its historic baseline for the week.

Nationally, during week 6 of 2016, 5.2% of patient visits reported through ILINet were due to influenza-like illness (ILI). The percentage is above the national baseline of 2.2% for week 6.

Laboratory Surveillance

During week 6 of 2017, reporting Franklin County sentinel medical facility laboratories tested 2,813 specimens, with 835 (29.7%) positive (Figure 4). The total number of tests done by local reporting labs from week 35 of 2016 through week 6 of 2017 is 25,094 with 2,639 (9.4%) positives (1,897 type A, 477 type B, 5 type A and B, 0 type unknown).

Nationally in week 6 of 2017, clinical laboratories reported 35,098 specimens tested for influenza viruses, 8,498 (24.2%) of which were positive (7,079 type A, 1,419 type B). Public health laboratories reported testing 2,918 specimens, 1,732 of which were positive (1,528 type A – of which 30 were A(H1N1)pdm09, 1,430 were A/H3, and 68 were not subtyped; 204 type B – of which 112 were Yamagata lineage, 44 were Victoria lineage, and 48 where lineage was not performed). Please visit the CDC website for more information, including cumulative data since week 40.

In week 6 of 2017, participating Ohio clinical labs reported 30,174 specimens tested for influenza this season thus far. Positive results include: (3) A(H1N1)pdm09; (227) A/H3N2; (1,707) Flu A Not Subtyped, and (534) Flu B (through 2/11/17). ODH Public Health Lab reported 486 specimens tested for influenza from various submitters this season thus far. Positive results include: (2) A(H1N1)pdm09; (305) A/H3N2; (32) Influenza B (through 2/11/17). Please visit the ODH website for more information.

ED Respiratory Visits

In the 6th week of 2017, the percentage of all ED visits categorized as respiratory increased compared to the percentage seen the previous week and is above its historic baseline for the week (Figure 5).

Over-the-Counter (OTC) Medication Sales

In week 6 of 2017, the majority of trends for categories of local over-the-counter medication sales tracked increased (increase in cough and cold, electrolyte, thermometer, pediatric anti-fever, adult anti-fever, and throat lozenge sales; decrease in chest-rub sales) compared to last week.
