

Highlights

- This is the first weekly local influenza summary for the 2016-17 season. In week 40 of 2016, the individual local flu activity indicator trends were mixed. As a whole, flu intensity was low.
- Geographic spread and local intensity designation (Click [here](#) for definitions) = SPORADIC, LOW
- Local medical facility labs reported 625 tests run with 4 (0.6%) positive results for week 40 of 2016. This is lower than last week's 1.1% and is slightly higher than the weekly baseline.
- The percentage of ED visits for both influenza-like-illness (ILI) increased and respiratory symptom increased slightly compared to week 39. The percentage of ED visits for ILI and respiratory symptoms are both higher than their respective baseline averages for the week.
- In week 40 of 2016, the trends for categories of local over-the-counter medication sales tracked were mixed (increase in electrolyte, thermometer, pediatric anti-fever, and throat lozenge sales; decrease in chest rub sales; stable cough and cold and adult anti-fever sales) compared to last week.
- In week 40, influenza activity was low in the U.S. Please [visit the CDC website for specific information](#) (National data is usually updated on Friday of each week).

Local Flu Activity Dashboard (All data are preliminary and may change as updated reports are received.)

Reportable Conditions (Cumulative Numbers as of Sept. 9, 2016)	2011	2012	2013	2014	2015	2016 YTD
Pediatric Influenza Associated Death Reported by Year (based on date of death)	0	0	0	0	0	0
Influenza Associated Hospitalizations (IAH) Reported by Admission Year ⁶	266	394	300	936	522	275
IAH comparison by Season (October - May or Weeks 35 - 20)	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17
Current season (2016-17) is from week 35 through 20.	95	512	486	1,007	270	3

¹Interpret with caution. Indicators with small numbers subject to large weekly percentage fluctuations.
²Number of weeks "▲" = Increase (>2%), "▼" = Decrease (>2%), "●" = Stable (-2% to +2%).
³Black line is current years data. Based on data availability, red line is historical average (excluding pandemic year).
⁴Data Source: Medical claims data from athenaHealth® (www.athenahealth.com). Rate of Flu or ILI visits to Franklin County, OH athenaHealth® network primary care practices/physicians. Claims data are subject to filing and processing time lags. Historical data are updated when they are received.
⁵Franklin County, OH residents only (based on zipcode). NOTE: Excludes one hospital system included in the past due to technical changes affecting visit classification assignment and numbers.
⁶Confirmed cases only. Based on jurisdiction equal to Franklin County or City of Columbus and admission date available in ODRS.

Influenza Morbidity and Influenza-Like Illness (ILI) Reports

In week 40, the preliminary local influenza and influenza-like-illness (ILI) visit rate to athenaHealth® providers (0.9 per 1,000 visits) decreased compared to the previous week and is below its baseline average for the week (Figure 1). The week 40 percentage of all Emergency Department (ED) visits categorized as ILI increased slightly compared to the previous week (Figure 3) and is higher than its historic baseline for the week.

Nationally, during week 40 of 2016, 1.1% of patient visits reported through ILINet were due to influenza-like illness (ILI). The percentage is below the national baseline of 2.2% for week 40.

Laboratory Surveillance

During week 40 of 2016, reporting Franklin County sentinel medical facility laboratories tested 625 specimens, with 4 (0.6%) positive (Figure 4). The total number of tests done by local reporting labs from week 35 of 2014 through week 40 of 2016 is 2,840 with 19 (0.7%) positives (4 type A, 15 type B, 0 type A and B, 0 type unknown).

Nationally in week 40 of 2016, clinical laboratories reported 9,799 specimens tested for influenza viruses, 170 (1.7%) of which were positive (88 type A, 82 type B). Public health laboratories reported testing 403 specimens, 40 of which were positive (37 type A – of which 4 were A(H1N1)pdm09, 28 were A/H3, and 5 were not subtyped; 3 type B – of which 0 were Yamagata lineage, 1 were Victoria lineage, and 2 where lineage was not performed). Please visit the CDC website for more information, including cumulative data since week 40.

In week 40 of 2016, participating Ohio clinical labs reported 372 specimens tested for influenza this season thus far. Positive results include: (0) A(H1N1)pdm09; (0) A/H3N2; (2) Flu A Not Subtyped, and (2) Flu B (through 10/8/16). ODH Public Health Lab reported 11 specimens tested for influenza from various submitters this season thus far. Positive results include: (0) A(H1N1)pdm09; (0) A/H3N2; (0) Influenza B (through 10/8/16). Please visit the ODH website for more information.

ED Respiratory Visits

In the 40th week of 2016, the percentage of all ED visits categorized as respiratory increased slightly compared to the percentage seen the previous week and is higher than its historic baseline for the week (Figure 5).

Over-the-Counter (OTC) Medication Sales

In week 40 of 2016, the trends for categories of local over-the-counter medication sales tracked were mixed ((increase in electrolyte, thermometer, pediatric anti-fever, and throat lozenge sales; decrease in chest rub sales; stable cough and cold and adult anti-fever sales) compared to last week.
