

Highlights

- In week 42 of 2016, the individual local flu activity indicator trends were mixed. As a whole, flu intensity was low and stable compared to last week.
- Geographic spread and local intensity designation (Click [here](#) for definitions) = SPORADIC, LOW
- Local medical facility labs reported 733 tests run with 8 (1.1%) positive results for week 42 of 2016. This is higher than last week's 0.8% and is similar to the weekly baseline.
- The percentage of ED visits for influenza-like-illness (ILI) was stable, while respiratory symptom visits decreased slightly compared to week 41. The percentage of ED visits for ILI symptoms is slightly higher, while respiratory symptom visits are similar to their respective baseline averages for the week.
- In week 42 of 2016, the trends for categories of local over-the-counter medication sales tracked generally increased (increase in cough and cold, electrolyte, chest rub, pediatric anti-fever, adult anti-fever, and throat lozenge sales; stable thermometer sales) compared to last week.
- In week 42, influenza activity was low in the U.S. Please [visit the CDC website for specific information](#) (National data is usually updated on Friday of each week).

Local Flu Activity Dashboard (All data are preliminary and may change as updated reports are received.)

Reportable Conditions (Cumulative Numbers as of Oct. 25, 2016)	2011	2012	2013	2014	2015	2016 YTD

Current season (2016-17) is from week 35 through 42.	95	512	486	1,007	263	6

¹Interpret with caution. Indicators with small numbers subject to large weekly percentage fluctuations.
²Number of weeks "▲" = Increase (>2%), "▼" = Decrease (>2%), "●" = Stable (-2% to +2%).
³Black line is current years data. Based on data availability, red line is historical average (excluding pandemic year).
⁴Data Source: Medical claims data from athenaHealth® (www.athenahealth.com). Rate of Flu or ILI visits to Franklin County, OH athenaHealth® network primary care practices/physicians. Claims data are subject to filing and processing time lags. Historical data are updated when they are received.
⁵Franklin County, OH residents only (based on zipcode). NOTE: Excludes one hospital system included in the past due to technical changes affecting visit classification assignment and numbers.
⁶Confirmed cases only. Based on jurisdiction equal to Franklin County or City of Columbus and admission date available in ODRS.

Influenza Morbidity and Influenza-Like Illness (ILI) Reports

In week 42, the preliminary local influenza and influenza-like-illness (ILI) visit rate to athenaHealth® providers (1.2 per 1,000 visits) increased compared to the previous week and is below its baseline average for the week (Figure 1). The week 42 percentage of all Emergency Department (ED) visits categorized as ILI was stable compared to the previous week (Figure 3) and is slightly higher than its historic baseline for the week.

Nationally, during week 42 of 2016, 1.3% of patient visits reported through ILINet were due to influenza-like illness (ILI). The percentage is below the national baseline of 2.2% for week 42.

Laboratory Surveillance

During week 42 of 2016, reporting Franklin County sentinel medical facility laboratories tested 733 specimens, with 8 (1.1%) positive (Figure 4). The total number of tests done by local reporting labs from week 35 of 2016 through week 42 of 2016 is 4,308 with 33 (0.8%) positives (9 type A, 24 type B, 0 type A and B, 0 type unknown).

Nationally in week 41 of 2016, clinical laboratories reported 9,677 specimens tested for influenza viruses, 128 (1.3%) of which were positive (77 type A, 51 type B). Public health laboratories reported testing 404 specimens, 23 of which were positive (20 type A – of which 4 were A(H1N1)pdm09, 10 were A/H3, and 6 were not subtyped; 3 type B – of which 0 were Yamagata lineage, 0 were Victoria lineage, and 3 where lineage was not performed). Please visit the CDC website for more information, including cumulative data since week 40.

In week 42 of 2016, participating Ohio clinical labs reported 2,494 specimens tested for influenza this season thus far. Positive results include: (0) A(H1N1)pdm09; (1) A/H3N2; (10) Flu A Not Subtyped, and (14) Flu B (through 10/22/16). ODH Public Health Lab reported 41 specimens tested for influenza from various submitters this season thus far. Positive results include: (0) A(H1N1)pdm09; (1) A/H3N2; (0) Influenza B (through 10/22/16). Please visit the ODH website for more information.

ED Respiratory Visits

In the 42nd week of 2016, the percentage of all ED visits categorized as respiratory decreased slightly compared to the percentage seen the previous week and is similar to its historic baseline for the week (Figure 5).

Over-the-Counter (OTC) Medication Sales

In week 42 of 2016, the trends for categories of local over-the-counter medication sales tracked generally increased (increase in cough and cold, electrolyte, chest rub, pediatric anti-fever, adult anti-fever, and throat lozenge sales; stable thermometer sales) compared to last week.
