

2017-2018 Columbus & Franklin County Seasonal Influenza Activity Weekly Summary (Week 17, Apr. 22nd, 2018– Apr. 28th, 2018)

Highlights

- In week 17 of 2018, the majority of individual local flu activity indicators decreased compared to last week. As a whole, flu
 intensity (composite indicator) decreased and is low.
- Geographic spread and local intensity designation (Click here for definitions) = REGIONAL, LOW
- Local medical facility labs reported 778 tests run with 65 (8.4%) positive results for week 17 of 2018.
- The percentage of ED visits for both influenza-like-illness (ILI) and respiratory symptoms decreased compared to last week.
 The percentage of ED visits for ILI and respiratory symptoms are above their respective baseline averages for the week.
- In week 17 of 2018, the trends for all local over-the-counter medication category sales tracked decreased (decrease in cough and cold, electrolyte, thermometer, chest rub, pediatric anti-fever, adult anti-fever, and throat lozenge sales) compared to last week.
- Nationally, influenza activity decreased. Please visit the CDC website for specific information.

Local Flu Activity Dashboard (All data are preliminary and may change as updated reports are received.)

²Number of weeks "▲" = Increase (>2%), "▼" = Decrease (>2%), "●" = Stable (-2% to +2%).

³Black line is current years data. Based on data availability, red line is historical average (excluding pandemic year).

⁴Data Source: Medical claims data from athenaHealth® (www.athenahealth.com). Rate of Flu or ILI visits to Franklin County, OH athenaHealth® network primary care practices/physicians. Claims data are subject to filing and processing time lags. Historical data are updated when they are recieved.

⁵Franklin County, OH residents only (based on zipcode). NOTE: Excludes one hospital system included in the past due to technical changes affecting visit classification assignment and numbers.

⁶Confirmed cases only. Based on jurisdiction equal to Franklin County or City of Columbus and admission date available in ODRS.

Influenza Morbidity and Influenza-Like Illness (ILI) Reports

In week 17, the preliminary local influenza and influenza-like-Illness (ILI) visit rate to athenaHealth® providers (4.3 per 1,000 visits) increased compared to the previous week and is above its baseline average for the week (Figure 1). The week 17 percentage of all Emergency Department (ED) visits categorized as ILI decreased compared to the previous week (Figure 3) and is above its historic baseline for the week.

Nationally, during week 17 of 2018, 1.5% of patient visits reported through ILINet were due to influenza-like illness (ILI). The percentage is below the national baseline of 2.2% for week 17.

Laboratory Surveillance

During week 17 of 2018, reporting Franklin County sentinel medical facility laboratories tested 778 specimens, with 65 (8.4%) positive (Figure 4). The total number of tests done by local reporting labs from week 35 of 2017 through week 17 of 2018 is 62,713 with 12,199 (19.5%) positives (8,490 type A, 3,701 type B, 7 type A and B, 1 type unknown).

Nationally in week 17 of 2018, clinical laboratories reported 12,794 specimens tested for influenza viruses, 948 (7.4%) of which were positive (319 type A, 629 type B). Public health laboratories reported testing 467 specimens, 135 of which were positive (39 type A – of which 21 were A(H1N1)pdm09, 15 were H3N2, and 3 was not subtyped; 96 type B – of which 59 were Yamagata lineage, 10 were Victoria lineage, and 27 where lineage was not performed). Please visit the CDC website for more information, including cumulative data.

Week 17 Ohio data was not available at the time of this publication. In week 16, Ohio clinical labs reported 76,205 specimens tested for influenza this season thus far. Positive results include: (200) A(H1N1)pdm09; (640) A/H3N2; (11,267) Flu A Not Subtyped, and (4,281) Flu B (through 4/21/18). In week 16, ODH Public Health Lab reported 1,223 specimens tested for influenza from various submitters this season thus far. Positive results include: (105) A(H1N1)pdm09; (683) A/H3N2; (199) Influenza B (through 4/21/18). Please visit the ODH website for more information.

ED Respiratory Visits

In the 17th week of 2018, the percentage of all ED visits categorized as respiratory decreased compared to the percentage seen the previous week and is above its historic baseline for the week (Figure 5).

Over-the-Counter (OTC) Medication Sales

In week 17 of 2018, the trends for all local over-the-counter medication category sales tracked decreased (decrease in cough and cold, electrolyte, thermometer, chest rub, pediatric anti-fever, adult anti-fever, and throat lozenge sales) compared to last week.
