

2015-2016 Columbus & Franklin County Seasonal Influenza Activity Weekly Summary (Week 8, Feb 21st, 2016– Feb 27th, 2016)

Highlights

- In week 8 of 2016, the vast majority of individual local flu activity indicator trends increased. Overall, flu intensity is moderate for week 8, and continued its increasing trend seen the past few weeks.
- Geographic spread and local intensity designation (Click [here](#) for definitions) = WIDESPREAD, MODERATE
- Local medical facility labs reported 1,331 tests run with 184 (13.8%) positive results for week 8 of 2016. This is higher than last week's 11.5% and is lower than the weekly baseline.
- The percentage of ED visits for influenza-like-illness (ILI) was stable, while respiratory symptom visits increased slightly compared to week 7. The percentage of ED visits for ILI is higher than its baseline average, while the respiratory symptom visit percentage was similar to its baseline average for the week.
- In week 8 of 2016, trends for all of the local over-the-counter medication sales tracked increased (increase in cough and cold, electrolyte, thermometer, chest rub, pediatric anti-fever, adult anti-fever, and throat lozenge sales) compared to last week.
- Nationally in week 8, influenza activity remained elevated in the United States. Please [visit the CDC website for specific information](#) (National data is usually updated on Friday of each week).

Local Flu Activity Dashboard *(All data are preliminary and may change as updated reports are received.)*

¹Interpret with caution. Indicators with small numbers subject to large weekly percentage fluctuations.

²Number of weeks "▲" = Increase (>2%), "▼" = Decrease (>2%), "●" = Stable (-2% to +2%).

³Black line is current years data. Based on data availability, red line is historical average (excluding pandemic year).

⁴Data Source: Medical claims data from athenaHealth® (www.athenahealth.com). Rate of Flu or ILI visits to Franklin County, OH athenaHealth® network primary care practices/physicians. Claims data are subject to filing and processing time lags. Historical data are updated when they are received.

⁵Franklin County, OH residents only (based on zipcode). NOTE: Excludes one hospital system included in the past due to technical changes affecting visit classification assignment and numbers.

⁶Confirmed cases only. Based on jurisdiction equal to Franklin County or City of Columbus and admission date available in ODRS.

CDC 122-Cities Mortality Reporting System: Pneumonia and Influenza (P&I) Mortality

In week 8 of 2016, 7.5% of all Columbus and Franklin County deaths were attributed to pneumonia and influenza. Nationally in week 8, 7.4% of deaths reported were attributed to pneumonia and influenza. This national percentage was above the national epidemic threshold for week 8.

Influenza Morbidity and Influenza-Like Illness (ILI) Reports

In week 8, the preliminary local influenza and influenza-like-illness (ILI) visit rate to athenaHealth® providers (5.6 per 1,000 visits) increased compared to the previous week and is above its baseline average for the week (Figure 1). The week 8 percentage of all Emergency Department (ED) visits categorized as ILI was stable compared to the previous week (Figure 3) and is slightly higher than its historic baseline for the week.

Nationally, during week 8 of 2016, 3.2% of patient visits reported through ILINet were due to influenza-like illness (ILI). The percentage is above the national baseline of 2.1% for week 8.

Laboratory Surveillance

During week 8 of 2016, reporting Franklin County sentinel medical facility laboratories tested 1,331 specimens, with 184 (13.8%) positive (Figure 4). The total number of tests done by local reporting labs from week 35 of 2014 through week 8 of 2016 is 22,181 with 608 (2.7%) positives (525 type A, 79 type B, 4 both A and B, 0 type unknown).

Nationally in week 8 of 2016, clinical laboratories reported 21,615 specimens tested for influenza viruses, 3,803 (17.6%) of which were positive (2,978 type A, 825 type B). Public health laboratories reported testing 2,008 specimens, 1,078 of which were positive (791 type A – of which 707 were A(H1N1)pdm09, 72 were A/H3, and 12 were not subtyped; 287 type B – of which 85 were Yamagata lineage, 40 were Victoria lineage, and 162 where lineage was not performed). Please visit the CDC website for more information, including cumulative data since week 40.

In week 8 of 2016, participating Ohio clinical labs reported 15,950 specimens tested for influenza this season thus far. Positive results include: (40) A(H1N1)pdm09; (4) A/H3N2; (173) Flu A Not Subtyped, and (33) Flu B (through 2/27/16). ODH Public Health Lab reported 188 specimens tested for influenza from various submitters this season thus far. Positive results include: (60) A(H1N1)pdm09; (4) A/H3N2; (10) Influenza B (through 2/27/16). Please visit the ODH website for more information.

ED Respiratory Visits

In the 8th week of 2016, the percentage of all ED visits categorized as respiratory increased slightly compared to the percentage seen the previous week and is similar to its historic baseline for the week (Figure 5).

Over-the-Counter (OTC) Medication Sales

In week 8 of 2016, trends for all of the local over-the-counter medication sales tracked increased (increase in cough and cold, electrolyte, thermometer, chest rub, pediatric anti-fever, adult anti-fever, and throat lozenge sales) compared to last week.
