

Highlights

- In week 47 of 2018, the individual local flu activity indicator trends generally increased compared to last week. As a whole, flu intensity (composite indicator) increased slightly and continues to be low.
- Geographic spread and local intensity designation (Click [here](#) for definitions) = REGIONAL, LOW
- Local medical facility labs reported 1,350 tests run with 36 (2.7%) positive results for week 47 of 2018.
- The percentage of ED for influenza-like-illness (ILI) was stable, while respiratory symptom visits increased slightly compared to last week.
- In week 47 of 2018, trends for local over-the-counter medication category sales tracked were mixed compared to last week (decrease in cough and cold, chest rub, pediatric anti-fever, adult anti-fever, and throat lozenge sales; increased electrolyte and thermometer sales) compared to last week.
- U.S. influenza activity increased slightly. Please [visit the CDC website for specific information](#).

¹Interpret with caution. Indicators with small numbers subject to large weekly percentage fluctuations.
²Number of weeks "▲" = Increase (>2%), "▼" = Decrease (>2%), "•" = Stable (-2% to +2%).
³Black line is current years data. Based on data availability, red line is historical average (excluding pandemic year).
⁴Data Source: Medical claims data from athenaHealth® (www.athenahealth.com). Rate of Flu or ILI visits to Franklin County, OH athenaHealth® network primary care practices/physicians. Claims data are subject to filing and processing time lags. Historical data are updated when they are received.
⁵Franklin County, OH residents only (based on zipcode). NOTE: Excludes one hospital system included in the past due to technical changes affecting visit classification assignment and numbers.
⁶Confirmed cases only. Based on jurisdiction equal to Franklin County or City of Columbus and admission date available in ODRS.

Influenza Morbidity and Influenza-Like Illness (ILI) Reports

In week 47, the preliminary local influenza and influenza-like-illness (ILI) visit rate to athenaHealth® providers (1.4 per 1,000 visits) increased compared to the previous week and is similar to its baseline average for the week (Figure 1). The week 47 percentage of all Emergency Department (ED) visits categorized as ILI was stable compared to the previous week (Figure 3) and is above its historic baseline for the week.

Nationally, during week 47 of 2018, 2.3% of patient visits reported through ILINet were due to influenza-like illness (ILI). The percentage is above the national baseline of 2.2% for week 47.

Laboratory Surveillance

During week 47 of 2018, reporting Franklin County sentinel medical facility laboratories tested 1,350 specimens, with 36 (2.7%) positive (Figure 4). The total number of tests done by local reporting labs from week 35 of 2018 through week 47 of 2018 is 11,057 with 119 (1.1%) positives (69 type A, 48 type B, 0 type A and B, 2 type unknown).

Nationally in week 47 of 2018, clinical laboratories reported 16,648 specimens tested for influenza viruses, 397 (2.4%) of which were positive (372 type A, 25 type B). Public health laboratories reported testing 374 specimens, 88 of which were positive (84 type A – of which 60 were A(H1N1)pdm09, 12 were H3N2, and 12 were not subtyped; 4 type B – of which 3 were Yamagata lineage, 0 was Victoria lineage, and 1 where lineage was not performed). Please visit the CDC website for more information, including cumulative data.

In week 47, Ohio clinical labs reported 11,819 specimens tested for influenza this season thus far. Positive results include: (6) A(H1N1)pdm09; (0) A/H3N2; (54) Flu A Not Subtyped, and (17) Flu B (through 11/24/2018). In week 47, ODH Public Health Lab reported 13 positive influenza tests from specimens sent by various submitters this season so far. Positive results include: (12) A(H1N1)pdm09; (0) A/H3N2; (1) Influenza B (through 11/24/2018). Please visit the ODH website for more information.

ED Respiratory Visits

In the 47th week of 2018, the percentage of all ED visits categorized as respiratory increased slightly compared to the percentage seen the previous week and is above its baseline for the week (Figure 5).

Over-the-Counter (OTC) Medication Sales

In week 47 of 2018, trends for local over-the-counter medication category sales tracked were mixed compared to last week (decrease in cough and cold, chest rub, pediatric anti-fever, adult anti-fever, and throat lozenge sales; increased electrolyte and thermometer sales) compared to last week.
