

### Highlights

- In week 3 of 2017, the majority of individual local flu activity indicator trends increased. As a whole, flu intensity (composite indicator) saw a sizable increase compared to last week and has moved to moderate for week 3.
- Geographic spread and local intensity designation (Click [here](#) for definitions) = WIDESPREAD, MODERATE
- Local medical facility labs reported 1,581 tests run with 255 (16.1%) positive results for week 3 of 2017. This is higher than last week's 10.1% and is similar to the weekly baseline.
- The percentage of ED visits for influenza-like-illness (ILI) and respiratory symptoms both increased compared to last week. The percentage of ED visits for both ILI and respiratory symptoms are above their respective baseline averages for the week.
- In week 3 of 2017, the trends for categories of local over-the-counter medication sales tracked were mixed (decrease in cough and cold, electrolyte, chest rub, and throat lozenge sales; increase in thermometer, pediatric anti-fever, and adult anti-fever sales) compared to last week.
- Nationally, influenza activity increased in week 3. Please [visit the CDC website for specific information](#) (National data is usually updated on Friday of each week).

### Local Flu Activity Dashboard (All data are preliminary and may change as updated reports are received.)

<sup>1</sup>Interpret with caution. Indicators with small numbers subject to large weekly percentage fluctuations.

<sup>2</sup>Number of weeks "▲" = Increase (>2%), "▼" = Decrease (>2%), "●" = Stable (-2% to +2%).

<sup>3</sup>Black line is current years data. Based on data availability, red line is historical average (excluding pandemic year).

<sup>4</sup>Data Source: Medical claims data from athenaHealth® (www.athenahealth.com). Rate of Flu or ILI visits to Franklin County, OH athenaHealth® network primary care practices/physicians. Claims data are subject to filing and processing time lags. Historical data are updated when they are received.

<sup>5</sup>Franklin County, OH residents only (based on zipcode). NOTE: Excludes one hospital system included in the past due to technical changes affecting visit classification assignment and numbers.

<sup>6</sup>Confirmed cases only. Based on jurisdiction equal to Franklin County or City of Columbus and admission date available in ODRS.

## **Influenza Morbidity and Influenza-Like Illness (ILI) Reports**

In week 3, the preliminary local influenza and influenza-like-illness (ILI) visit rate to athenaHealth® providers (3.8 per 1,000 visits) increased compared to the previous week and is below its baseline average for the week (Figure 1). The week 3 percentage of all Emergency Department (ED) visits categorized as ILI increased compared to the previous week (Figure 3) and is above its historic baseline for the week.

Nationally, during week 3 of 2016, 3.4% of patient visits reported through ILINet were due to influenza-like illness (ILI). The percentage is above the national baseline of 2.2% for week 3.

## **Laboratory Surveillance**

During week 3 of 2017, reporting Franklin County sentinel medical facility laboratories tested 1,581 specimens, with 255 (16.1%) positive (Figure 4). The total number of tests done by local reporting labs from week 35 of 2016 through week 3 of 2017 is 18,358 with 725 (3.9%) positives (552 type A, 169 type B, 4 type A and B, 0 type unknown).

Nationally in week 3 of 2017, clinical laboratories reported 26,135 specimens tested for influenza viruses, 4,813 (18.4%) of which were positive (4,306 type A, 507 type B). Public health laboratories reported testing 2,096 specimens, 1,150 of which were positive (1,072 type A – of which 18 were A(H1N1)pdm09, 980 were A/H3, and 74 were not subtyped; 78 type B – of which 35 were Yamagata lineage, 20 were Victoria lineage, and 23 where lineage was not performed). Please visit the CDC website for more information, including cumulative data since week 40.

In week 3 of 2017, participating Ohio clinical labs reported 23,321 specimens tested for influenza this season thus far. Positive results include: (2) A(H1N1)pdm09; (112) A/H3N2; (854) Flu A Not Subtyped, and (128) Flu B (through 1/21/17). ODH Public Health Lab reported 251 specimens tested for influenza from various submitters this season thus far. Positive results include: (1) A(H1N1)pdm09; (138) A/H3N2; (15) Influenza B (through 1/21/17). Please visit the ODH website for more information.

## **ED Respiratory Visits**

In the 3<sup>rd</sup> week of 2017, the percentage of all ED visits categorized as respiratory increased compared to the percentage seen the previous week and is above its historic baseline for the week (Figure 5).

## **Over-the-Counter (OTC) Medication Sales**

In week 3 of 2017, the trends for categories of local over-the-counter medication sales tracked were mixed (decrease in cough and cold, electrolyte, chest rub, and throat lozenge sales; increase in thermometer, pediatric anti-fever, and adult anti-fever sales) compared to last week.
